Guidelines for Display Rules and Regulations

2019 North American Update

Made possible by a generous grant from
FREEMAN®

The following ***Guidelines for Display Rules and Regulations*** have been established by the International Association of Exhibitions and Events® (IAEE) to assist in promoting continuity and consistency among North American exhibitions and events. This revised 2019 edition is offered as a resource for exhibition and event organizers to use in creating consistent and fair exhibiting standards for their events.

Recognizing that every show is unique, IAEE presents the information contained within as recommendations or suggestions for exhibiting standards each Organizer should consider. Organizers are encouraged to review the ***Guidelines*** and then develop their own show-customized set of exhibiting rules and regulations based on the individual features of their specific exhibition or event.

Once an Organizer has finalized their show's official set of display rules, it is good practice to provide access to a digital copy within the show's exhibitor prospectus, an exhibitor services kit, and the official rules and regulations pertaining to exhibitor participation. By providing exhibitors with the professional standards expected of their displays and participation, they will be prepared to properly design, build and plan their booth's layout and content allowing for an environment where all exhibitors will have the opportunity for successful interaction with their audiences.

Important Note: Although compliance with fire, safety, the U.S. Americans with Disabilities Act (ADA), and other state, federal or provincial government requirements have been addressed, Organizers should always check with exhibition service contractors and the facility for specific details on local regulations and requirements.

*IAEE is a global association that serves as the foremost authority on exhibitions and events management and operations, and these **Guidelines** are the model for most North American exhibitions and events but in all instances, organizations should consult their legal counsel. In no event shall IAEE be held liable for damages of any kind in connection with the material, methods, information, techniques, opinions or procedures expressed, presented, or illustrated in these **Guidelines** or related materials.*

International
Association of
Exhibitions and Events®

IAEE has identified two distinctly different styles of show display regulations. One style is “Line-of-Sight” while the second is “Cubic Content.” Organizers should decide which style is best suited to their event or designated section of the event.

LINE-OF-SIGHT STYLE

Line-of-Sight display rules provide restrictions on certain areas of booths to allow attendees to view neighboring booths in their line of sight as they walk the floor. There are a variety of booth types, and each one is addressed below with specific insight on how to implement Line-of-Sight regulations.

LINEAR BOOTH

The ability to have products or services easily seen by attendees as they walk the aisles is essential to all exhibitors, and that is the basis for including a Linear Booth Line-of-Sight setback rule. Linear Booths, also called “in-line” booths, are generally arranged in a straight line and have neighboring exhibitors on their immediate right and left, leaving only one side exposed to the aisle.

Dimensions

For purposes of consistency and ease of layout and/or reconfiguration, floor plan design in increments of 10ft (3.05m) has become the de facto standard in the United States. Therefore, unless constricted by space or other limitations, Linear Booths are most commonly 10ft (3.05m) wide and 10ft (3.05m) deep, i.e. 10ft by 10ft (3.05m by 3.05m). A maximum back wall height limitation of 8ft (2.44m) is generally specified to prevent display materials from imposing on neighboring exhibits behind the back wall.

Use of Space

Regardless of the number of Linear Booths utilized, e.g. 10ft by 20ft (3.05m by 6.10m), 10ft by 30ft (3.05m by 9.14m), 10ft by 40ft (3.05m by 12.19m), etc., display materials should be arranged in such a manner so as not to obstruct sight lines of neighboring exhibitors. The maximum height of 8ft (2.44m) is allowed only in the rear half of the booth space, with a 4ft (1.22m) height restriction imposed on all materials in the remaining space forward to the aisle. Note: When three or more Linear Booths are used in combination as a single exhibit space, the 4ft (1.22m) height limitation is applied only to that portion of exhibit space which is within 10ft (3.05m) of an adjoining booth.
